Your CAC is **burning**

Get a free landing page audit

Your landing page is **bleeding** money.

Most SaaS founders think their landing page is fine. Then they check their analytics.

PROBLEM #1 Generic Hero Sections, failed 3 Impression test

Your hero section sounds like everyone else's. The best platform for X doesn't tell visitors why they should care. They bounce in 3 seconds.

PROBLEM #2 Weak CTAs that don't match buyer intent

Get Started and Learn More are conversion killers. Your CTA needs to match where your visitor is in their buying journey. Yours doesn't.

PROBLEM #3 Zero Social Proof Strategy

Slapping random logos on your page isn't social proof. Real social proof addresses specific objections at the exact moment they appear.

THESE ARE JUST THE OBVIOUS ONES

Here's exactly what's in your **free** audit

We audit your landing page against 47 conversion principles and show you exactly what's broken and how to fix it.

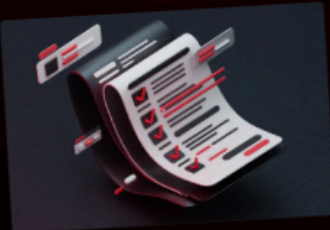

01 Video Walkthrough

Screen recording of your landing page with real-time commentary on what's broken and how to fix it. No fluff, just actionable fixes.

02 Written Audit Report

Page-by-page breakdown with screenshots, annotations, and specific copy/design recommendations ranked by impact.

03 Prioritized Action Plan

We rank every fix by effort vs impact. Start with the quick wins that drive immediate results.

04 Competitor Analysis

The problem

Growth stalled by busywork? Too many moving parts.

Your revenue doubled, but your team didn't. Manual work exploded, onboarding takes hours, data is everywhere, and product is babysitting spreadsheets.

Endless Copy-Paste

Your best people spend 6 hours a week copying data between tools. That's 312 hours a year per person doing work a script could handle.

1

Waste of Time

Every new customer triggers 10 manual steps across 5 tools. Your team executes this perfectly 98% of the time. The other 9% creates friction your leadership team has to put out.

2

Team Burnout

You hired a growth marketer to build campaigns. They spend 40% of their time pulling reports and updating Notion. In three months, they're start looking for a new job where they can do actual marketing.

Setup in **minutes**, not months

No engineers required. No technical debt created.

1

Connect your tools

Stack, Notion, HubSpot, Stripe, whatever you use. GitHub takes 30 seconds per tool. You'll have 5 tools connected in under 3 minutes.

2

Describe what to automate

"When a deal closes in HubSpot over \$10k, create a project in Asana, notify the team in Slack with the contract details, and send the customer a personalized welcome email." Write it like that. It works.

3

Watch it run forever

Your workflow executes perfectly every time. 2am Sunday? Done. During your team's office? Done. When everyone's on vacation? Done. It just runs.

What happens when SaaS teams **automate busywork**

Real numbers from teams who stopped wasting time

\$47,000 saved per year

What our **AI agent** handles so you don't have to:

Customer onboarding from hell

Automate every onboarding step across all tools. Accounts, emails, integrations, updates. Nothing missed. No manual work.

Data that lives everywhere

Keep Salesforce, Notion, Asana, Slack, and your warehouse in sync automatically. One source of truth in real time.

Reports nobody wants to pull

Automated reports sent on schedule. Metrics collected, formatted, and delivered without spreadsheets.

The boring stuff that causes fires

Tickets, follow-ups, renewals, updates. The small tasks handled automatically before they become problems.
